Summary

Full Stack Developer with 1.5 years of experience in React.js, Next.js, Node.js, PHP, and MySQL, building scalable web applications and REST APIs. Experienced in state management, REST API integration, authentication workflows, and database-driven features. Comfortable working across frontend and backend using WordPress, JavaScript (ES6+), basic TypeScript, and SQL/NoSQL databases. Strong logical thinking, quick learning ability, and effective collaboration skills.

Education

Master of Computer Applications (MCA)

Aug 2024 – Jul 2026

Trinity Academy of Engineering, Pune

Bachelor of Computer Applications (BCA)

Sep 2021 – Jun 2024

Shankarlal Khandelwal College of Science, Commerce and Arts, Akola

Work Experience

Software Developer

Jan 2025 – Present (**1.5 years**)

NZ Solutions, Pune

- Contributing to production-level applications using WordPress, React.js, Next.js, PHP, and Node.js.
- Developed 20+ reusable React components, reducing development time and improving maintainability.
- Integrated frontend applications with Node.js and Express.js REST APIs.. Worked on authentication flows and protected routes. Applied SSR and SSG techniques in Next.js to improve performance and SEO.
- Collaborated in Agile teams using GitHub for version control.

Full Stack Website Development Intern

Jan 2024 – Mar 2024

Bhupati Software's Private Limited

- Built dynamic web applications using PHP, MySQL, and JavaScript.
- Implemented secure authentication mechanisms.
- Optimised SQL queries to improve backend performance.

Technical Skills

UI Libraries: Tailwind CSS, Bootstrap, Material UI (familiar)

Backend: Node.js, Express.js, PHP, Laravel, REST APIs, JWT Authentication, NextAuth.js

Databases: MySQL, PostgreSQL, Oracle, MongoDB

Tools & Frameworks: Git, GitHub, Laravel, Composer

Mobile Technologies: Flutter, Android Studio, Firebase

Other Skills: OOP, UI/UX Design, API Integration, Cloud Basis (AWS)

Projects

EazyCare – Hospital Management System (HMS)

MERN Stack (MongoDB, Express.js, React.js, Node.js), JWT, REST APIs, Tailwind CSS, OpenAI APIs

- Developed a Hospital Management System handling 10+ modules including OPD, IPD, Billing, Expense Management and Reporting, reducing manual administrative effort.
- Implemented patient management, OPD/IPD, billing, expense management, and reporting dashboards.
- Ensured secure data handling and hospital-level data isolation.

Expenzo – Expense Tracker

- Developed a personal finance and expense tracking system using PHP and MySQL.
- Implemented expense categorization and dynamic data entry.
- Integrated interactive DataTables with filtering and date range selection.
